Craig,

Alternative Countermeasures for oil spills including wetlands has been a topic at OSC Readiness several times over several years. Also NOAA has Job Aids on the subject Below is the one for Alaska.. There are a host of EPA people with this experience. Poll the Regional OSC's and Oil Spill Managers. Help will come out of the woodwork.

Greg Powell and Fred Stroud teach an oil spill response course through ERT.

Also see attached cleanup criteria, which I previously attached to the Near Shore Monitoring Plan. This includes soil and sediment criteria with some cautions about implementation..These are applicable in marshes as well.

Harry

---

To All: Bob P. stopped by the EOC Solid Waste desk this evening asking if we knew of any experts in cleaning up oil in marshes. He said he needed some names first thing in the morning. Frankly, we don't have any expertise in this area and that we rarely if ever get involved in responses to oil spill activities. I am wondering if any of you know of any individuals that have expertise in this area. . Thank you. Jim
